POWER SPRINGS

At last something stopping you going “weak at the knees”

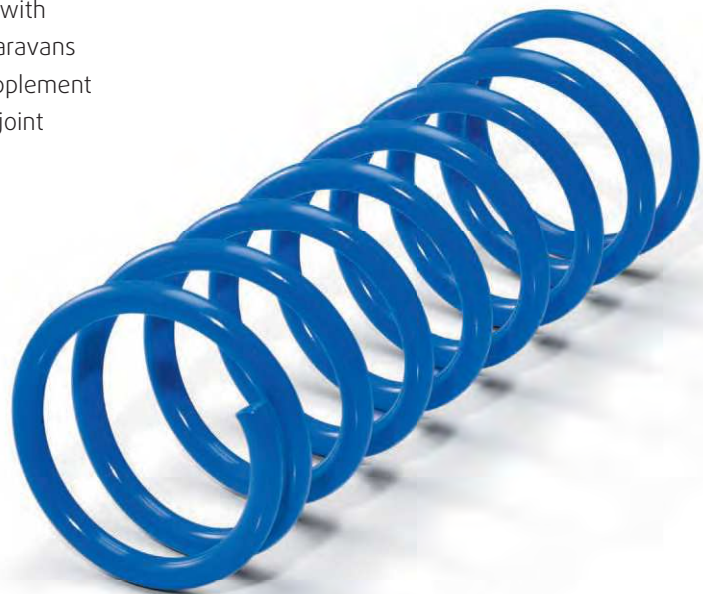

Simple and effective. Under extreme conditions like a sudden evasive actions, a heavily loaded vehicle performs better with additional power springs. A significant improvement for caravans and commercial vans. The power springs are the ideal supplement to a towbar by Westfalia-Automotive, because through a joint shoring in the workshop synergy effects will occur.

Improved safety with heavy loads

Low costs

TÜV-tested*

*by German Technical Inspection Authority

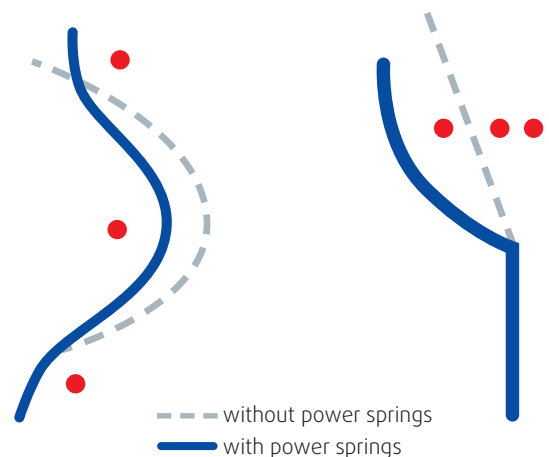

SLALOM AND OBSTACLE AVOIDANCE TEST WITH 300 KG LOAD IN BOOT.

WITHOUT POWER SPRINGS (image left)

Heavy loads can be too much for the standard suspension system of a vehicle – “bringing it to its knees” so to speak at the rear. The result: longer braking distances, risk of skidding and even possibly fishtailing in curves with crosswinds or during overtaking. This is caused by rough or uneven roads and potholes. All reasons to reinforce your vehicle’s original suspension system when driving with heavy loads.

WITHOUT POWER SPRINGS (image right)

Power springs from Westfalia-Automotive are designed to be simple and effective. Their extra boost of power is what’s needed to keep your vehicle “off its knees”. They provide extra on-road stability and offer better grip for the front tyres to keep braking distances short. You can tow heavy loads more easily while minimizing the risk of trailers or caravans fishtailing.

Dear customer,

You now have the new 2024 Westfalia-Automotive catalogue covering towbars, electrical kits, bicycle racks and spare parts. We have made every effort to incorporate the suggestions and modifications that you have provided us with to further enhance this catalogue. This catalogue provides a wealth of important information and is designed to help you develop and promote your towbar fitting business.

Please note the following:

Legend

The legend for the columns in this catalogue can be found on the first pages of the catalogue..

KIT = Towbar + 13-pin electrical kit

Our KIT program has been further enhanced with the introduction of additional references. You will now find a KIT for nearly all of our towbar range which is supplied complete with a vehicle specific wiring kit. You can identify these KITs by the last figures of the part number: ... 900013.

Installation times

The specified installation times should only be used as an indication for our products of the time required to carry out an installation. The length of time required to complete this will depend on a number of factors, the condition of the vehicle and/or the skills and experience of the individual carrying out the work. In certain circumstances, the specification of a vehicle may vary significantly, such as when an automatic CD changer has to be removed in order to install the electrical equipment, then the required assembly time may increase considerably. Where possible, always try and ascertain the full specification of the vehicle. Limit the troubleshooting to approximately 0.5 hours for mechanical or 0.75 hours for electrical work in case of assembly or functional problems. In case of assembly or functional problems, contact Westfalia customer service.

Vehicles with parking sensors:

When mounting permanently attached towbars, the towball may in some instances activate the vehicles rear parking sensors. This problem can be overcome by fitting a detachable towbar where the neck can be removed from the vehicle when not required for towing. Some vehicles do come with cut off switches for the rear parking sensors but you should check with the customer to confirm that this is an acceptable solution.

The following is valid before assembling a towbar and an electrical kit:

Always observe the instructions of the vehicle manufacturer in the operating manual of the vehicle.

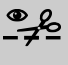

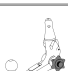

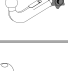

Towing capacity

Please check whether a towing capacity is entered in the vehicle documents. If not the installation of a towbar is not approved by the vehicle manufacturer and is therefore not permitted. Always check the VIN plate or the vehicle handbook to verify the towing capacity of the vehicle.

Wiring Kits

Accessories

Spare parts

Universal wiring kits (12 V on-board electrical systems)

Turn signal monitoring by flash unit with C2 function

Universally applicable for vehicles **without** Checkcontrol system, with European 3-pin replacement flash unit with C2 connection with rear fog light shutdown

order no.

300 060 300 107

300 060 300 113

300 061 300 113 (with adapter for deviant flash unit wiring)

300 096 300 163 (only wire set for vehicles with C2 feature)

Turn signal monitoring by control unit with double flashing rate

Universally applicable for vehicles **without** Checkcontrol system, with rear fog light and acoustic parking system shutdown

order no.

300 052 300 113 (socket with screw contacts, extended socket supplyline, e.g.: for flatbed)

300 072 300 107 (socket with screw contacts)

300 072 300 113 (socket with screw contacts)

Turn signal monitoring by control unit with acoustic error message

Universally applicable for vehicles **with** Checkcontrol system, partially also for vehicles with data bus technology (CAN), with rear fog light and parking system shutdown

order no.

300 210 300 113 (socket with screw contacts)

Extension kits

Continuous positive and charging line extension kit

Contains the connection for contact 9 and 10 acc. DIN/ISO 11446 incl. fuse and cut-off relay, 12 V

order no.: 300 025 300 113

10p CCM 506 079 (only complete kit)

Signal amplification for Checkcontrol, continuous positive necessary

order no.: 300 025 300 173

Electric Kit, towbar

(Catalogue identification "D1" in the 16 table column)
Contains the connection for contact 9 (13) acc. DIN/ISO 11446 incl. fuse.

order no.: 300 027 300 113

charging cable (extension kit)

(Catalogue identification "L1" in the 17 table column)
Contains the connection for contact 10 and 11 acc. DIN/ISO 11446 incl. fuse and cut-off relay, 12 V

order no.: 300 028 300 113

Rear fog light / Acoustic parking system switch-over kit

Contains a switch-over relay (12V)/ Connection accessories for changing the polarity of the specific function, for example earth-switched rear fog lights on the vehicle.

order no.: 300 065 300 005
